Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant should be aware that highlighting sections renders the text virtually illegible (see <http://portal.uspto.gov/external/portal/pair>) .

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Kika (2004/0155594).

Kika teaches a headlight for a motor vehicle comprising a base 50, a light device including two light member 20 (fig. 9), round cylindrical glass cover 21, two tubes (not labeled in fig. but labels were added to fig. 2A below) coupled to the light members and partly outside the cover, two cables 22 and 23 coupled to the light members for power, and a controlling means [0169] comprising a stabilizer 12 and a control line g for operating a switch to control the lighting operation, circuits shown in figure 3A-3B, and socket portion 11.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2875

Claims 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kika in view of Coushaine (5,291,092).

Kika teaches the invention described above but lacks the teaching of the tube being made of china or ceramics.

Coushaine teaches a ceramic tube 60 in a high intensity discharge headlamp.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the headlamp taught by Kika with the ceramic tube taught by Coushaine in order to provide a material with better insulating properties.
